

Promises Kept

Macroeconomic Performance & Monetary Reforms

Unified Exchange Rate System: The multi-window foreign exchange system was eliminated to stop market arbitrage.

Rebuilding Official Foreign Exchange Reserves: Net official foreign exchange reserves were rebuilt to \$42.2 billion by mid-2025.

FX Market Liquidity Expansion: Average monthly foreign exchange market trading turnover grew to \$8.6 billion.

Termination of the Petrol Fuel Subsidy: The petrol fuel subsidy was terminated to redirect funds to public infrastructure and services.

FIRS Tax Administration & Compliance Automation: Automated compliance tools expanded national revenue collections to a historic N21 trillion in 2024.

Debt Service-to-Revenue Ratio Reduction: The sovereign debt service burden was slashed from over 120% down to 64%.

Monetary Policy Rate & Cash Reserve Ratio Adjustments: Orthodox monetary frameworks and strategic operations were deployed to anchor inflation.

Clearance of Historic FX Backlog: A long-standing inherited \$7 billion foreign exchange backlog was fully cleared and settled.

Commercial Banking Sector Recapitalisation Directive: A regulatory mandate was issued to expand capital floors across commercial banks.

Bureau De Change Structural Overhaul: Retail currency tiers were cleaned up using strict digital reporting and biometric verification.

Diaspora Remittance Liberalization: Pricing caps were liberalized and new operators were licensed to route flows through formal channels.

Sovereign Debt Strategy Realignment: Federal borrowing transitioned completely away from central bank overdrafts to long-term bonds.

Integrated Revenue Dashboard: A real-time tracking portal was launched to link revenue agencies directly to the central treasury.

Subnational FAAC Payout Allocations: Statutory revenue distributions to state and local governments were boosted by 78% by mid-2025.

Local Government Direct Fiscal Autonomy Synergy: Direct financial allocations to Local Government Areas were institutionalized following a judicial confirmation.

Waiver System Restructuring: Discretionary corporate import waivers were replaced with a performance model tied to job creation.

Automated Customs Reform: Advanced cargo scanners and digital single-window clearings were integrated to eliminate port bottlenecks.

Luxury Consumption Tax Orientation: Specialized levies were introduced to target high-value luxury items, premium real estate, and digital services.

Infrastructure, Power, Transit & Logistics

Presidential Infrastructure Development Fund: This fund was revitalized to provide continuous upfront capital to legacy transport assets.

Lagos-Calabar Coastal Superhighway: Phase 1 construction commenced on a 700-kilometer, 10-lane mega economic corridor.

Sokoto-Badagry Legacy Superhighway Corridor: Work initiated on a multi-lane northern inland route cutting across agricultural belts.

Deep-Water Port Modernisation Concessions: Over \$1 billion in private concession financing was leveraged to modernize critical structural berths.

Comprehensive Rail Freight Modernisation: Direct port-rail links achieved full commercial operations to move high-volume cargo inland.

Electricity Act 2023 Reforms: The national grid was de-monopolized, empowering individual states to manage their own power.

National Mass Metering Programme: Over N100 billion was disbursed to supply 1.5 million smart meters and eliminate arbitrary billing.

Siemens Presidential Power Initiative: High-capacity substations were installed to expand the national grid's wheeling capacity.

Metropolitan Light Rail Urban Mass Transit Push: Metropolitan metro networks were launched, including the Abuja Light Rail and Lagos Blue and Red lines.

Presidential Compressed Natural Gas Initiative: The government rolled out 1,500 units of high-capacity CNG buses and free conversion kits.

Decentralized Re-Asphalting and Localized Road Maintenance: Regional youth cooperatives were hired to continuously repair and patch inter-city roads.

The Inland Dry Port Acceleration Act: Regional Inland Dry Ports were upgraded and fully operationalized to serve as official shipping destinations.

National Aviation Sector Overhaul: Advanced landing systems were deployed and international terminals were completed in four major cities.

The Rural Access and Agricultural Marketing Project: The government partnered with states to construct thousands of kilometers of rural feeder roads.

Apapa and Tin Can Port Decongestion Interventions: An automated electronic truck call-up system was enforced alongside expressway rehabilitation.

Strategic Re-Asphalting Clusters: Decentralized asphalt production plants were established across the 6 geopolitical zones for emergency patching.

Agribusiness, Food Security & Value Retention

National Mechanisation Drive: Over 2,000 advanced tractors and specialized farming implements were deployed nationwide.

National Agricultural Growth Scheme: High-yield seeds and subsidized fertilizers were distributed to over 600,000 smallholders.

Special Agro-Industrial Processing Zones: Implementation was accelerated to build processing factories, storage facilities, and logistics hubs.

Post-Harvest Loss Mitigation Infrastructure: Modular, solar-powered cold hubs and silo grain clusters were constructed and upgraded.

Infrastructure: Modular, solar-powered cold hubs and silo grain clusters were constructed and upgraded.

Federal Ministry of Livestock Development: A dedicated ministry was created to upgrade grazing reserves and resolve herder-farmer friction.

Bank of Agriculture Capital Restructuring: The bank was injected with capital to establish a concessionary credit pool capped at 9% interest.

Social Collateral Financing Framework: Property collateral bottlenecks were replaced with an institutionalized social group guarantee model.

Nigeria-Brazil Green Imperative Project: A \$1.1 billion precision tech-transfer framework kicked off to establish localized equipment service centers.

National Smallholder Farmers Fund: A \$1 billion joint facility was established to provide financing and price off-take guarantees.

Export Quality Control Standardization Protocol: Unified certification protocols were established to verify that agro-commodities meet global standards.

Digitized Commodity Board Exchanges: Commodity exchange software was expanded to allow rural farmers to track real-time crop valuations.

AgriTech and Youth/Female Concessionary Credit Windows: Special financial instruments like the N250 billion Agro-Youth Startup Credit were institutionalized.

Strategic Re-stocking of Grain Reserves: A grain buy-back scheme was executed through certified hubs to replenish national strategic reserves.

Biological Crop Defense Initiatives: Targeted funding was provided to distribute biological pest-control treatments to preserve vulnerable crops.

Smallholder Land Security Protocols: Low-cost, simplified customary rights of occupancy were operationalized through state land registries.

Digital Economy, Creative Industry & Innovation

The Three Million Technical Talent Initiative: Intensive training pathways became operational to train youth in advanced software and tech skills.

Investment in Digital and Creative Enterprises Fund: A \$617 million program was fully operationalized to supply startup capital and technical training.

Borderless Broadband Fibre Penetration Scheme: Construction launched on 90,000 kilometers of fiber backbone, pushing broadband coverage past 51%.

State-Level Innovation & Co-working Hubs: The government funded and established 74 physical hubs providing free high-speed internet and power.

The Nigerian Artificial Intelligence Research Scheme: This active scheme awards financial grants, cloud credits, and mentorship to local AI teams.

The Creative Sector Development Accord: Low-interest production concession financing windows were established to support filmmakers and creators.

National Digital Public Infrastructure Integration: Over 115 million unique identities were linked by integrating NINs with passport and bank registries.

The Outsourcing Nigeria Initiative: Massive tech call centers and remote work villages were launched for international remote support.

Industrials, Solid Minerals & Trade Expansion

Local Value-Add Mineral Processing Mandate: Raw mineral exports were banned, forcing firms to operate 18 local processing plants.

The N75 Billion Industrial Revival Facility: This manufacturing intervention fund was disbursed to deliver working capital loans capped at 9% interest.

Comprehensive Free Trade Zone Upgrades: Infrastructure upgrades were executed to connect major free trade zones to independent power grids.

The N50 Billion MSME Growth Clearinghouse: A low-interest commercial credit fund was rolled out and disbursed to over 75,000 small enterprise owners.

Revitalising Local Steel Production Hub Campaigns: A roadmap was launched to bring national steel assets back to life via private investment concessions.

The Solid Mineral Security Cognisance (Mining Marshals): A specialized, armed security unit was established to arrest illegal operators in mineral-rich states.

The Nigerian Export Trade Houses Framework: Physical trade houses were established in international hubs to serve as wholesale centers for non-oil exports.

PEBEC Ease of Doing Business Decrees: Regulatory simplifications were implemented to enforce automated company registration and eliminate port duplicate inspections.

Education, Skills & Human Capital Development

The Student Loan Revolution (NELFUND): An automated, interest-free loan portal was launched with over 950,000 registered users.

Universal Basic Education Commission Matching Grants: N150 billion was unlocked to reconstruct classrooms and re-enroll 2.4 million children.

National Commission for Almajiri and Out-of-School Children Education: Over 250 specialized bilingual academies were upgraded to integrate vocational skills.

Campus Power Independence: Off-grid solar hybrid microgrids were actively deployed to provide 24/7 power to public universities and teaching hospitals.

Vocational Skills and Employability Curriculum Realignment: Training across technical colleges was revamped to match modern certifications in automation and renewable energy.

Technical Teacher Retooling Accord: Professional retraining was funded for instructors to learn modern CNC machinery and industrial robotics.

Healthcare Reforms & Medical Infrastructure

Mass Rural Primary Healthcare Center Revitalization: Over 8,800 rural clinics were fully revitalized with solar power, clean water, and diagnostics.

Tertiary Regional Oncology Centers Corridor: Six regional centers became active with advanced linear accelerators and radiotherapy machinery.

National Health Insurance Authority Net Expansion: Health insurance enrollment was optimized to pass 24 million citizens.

Pharmaceutical Domestication Framework: Zero-tariff import exemptions were introduced on essential machinery, driving a 45% growth in pharmaceutical output.

Housing, Urban Renewal & Environment

The Renewed Hope Cities and Estates Programme: Massive construction became active with 15,000 residential units currently under construction.

Democratising the National Housing Fund: The FMBN was overhauled, expanding single-digit 6% mortgage beneficiaries by 42%.

Re-greening of the Great Green Wall Corridor: Over 25,000 hectares of shelterbelts were reclaimed and restored to halt desert encroachment.

Reclaiming Coastal and Inland Erosion Hotspots: Ecological funding was deployed to stabilize 34 major erosion sites across various states.

The Urban Waste-to-Energy Conversion Architecture: Pilot frameworks were made active to convert landfill solid waste into biogas and power.

The Nigerian Carbon Market Initiative: A structured domestic carbon emissions trading ecosystem was established and is currently active.

Tourism, Creative Arts & Culture Heritage

The Reborn National Theatre & Creative Arts Hub: The restoration of the National Theatre in Lagos was completed with modern performance halls.

The Global Cultural Heritage Promotion Accord: A marketing campaign was launched to secure global recognition and drive tourism for major cultural festivals.

Tourism Circuit Infrastructure Upgrades: Civil works kicked off to deploy solar security and roads across historical and eco-tourism sites.

Hospitality and Creative Sector Tax Incentives: Tax adjustments granting pioneer status and zero-tariff exemptions for production equipment were implemented.

Oil, Gas & Clean Energy Transition

Domestic Refining Self-Sufficiency Framework: Import dependency was reduced by reaching 75% self-reliance through local crude supply and facility rehabilitation.

The Decade of Gas Infrastructure Acceleration: Execution of critical transport pipelines like the AKK and OB3 links achieved major milestones.

Rural Solar Mini-Grid Corridors: Green energy expanded with 185 active solar hybrid mini-grid hubs powering remote clinics and schools.

PIA Host Community Development Trusts: Upstream oil companies funded 84 development trusts by directing 3% of operating expenses to host communities.

The National Autogas Rollout Scheme: Refueling stations were launched along interstate highways to transition vehicle fleets to CNG and LPG.

The Flare Gas Commercialisation Programme: Active capture operations were enforced by licensing operators to redirect flare gas into commercial cooking gas.

Strategic Petroleum Revenue Discipline: Opaque crude oil swap arrangements were eliminated in a transition to transparent, market-driven frameworks.

The National Clean Cookstove Initiative: Over 500,000 high-efficiency, eco-friendly cookstoves were deployed to protect households from toxic woodsmoke.

National Security, Defence & Sovereign Stability

Advanced Combat Air Assets Acquisition: The Air Force was modernized with over 24 new active tactical platforms, including helicopters and drones.

Expanding the Falcon Eye Maritime Surveillance: Upgraded radar and satellite networks helped recover hydrocarbon production by intercepting pirate ships.

Defense Force Manpower and Recruitment Expansion: More than 35,000 trained troops were actively recruited and deployed across tactical branches.

The Tech-Driven Border Surveillance e-Gates: Twelve automated border management e-gates became active for biometric tracking of cross-border movements.

The Tactical Agro-Rangers Formation Re-engineering: Specialized mobile civil defense units deployed 10,000 officers to protect farming clusters.

Reforming the National Cybercrime Security Center: An intelligence facility was fortified and made active to intercept cyber attacks and secure data.

Decentralized Police Command Operationalisation: Over 10,000 vehicles and tactical inputs were deployed to state police commands.

Inter-Agency Intelligence Fusion Infrastructure: A unified Joint Intelligence Fusion Center was established and is now fully operational.

The ECOWAS Regional Security Cohesion Accord: Nigeria spearheaded active tactical defense actions against transnational arms traffickers.

Social Investment, Welfare & Worker Cushions

Biometric Social Register Safety Nets: The National Social Register was overhauled, verifying 12 million households for direct cash transfers.

Presidential Conditional Grant Scheme: Direct interest-free cash grants funded 1.8 million nano-businesses, market women, and artisans.

National Worker Support Wage Framework: A prompt national wage award was activated and a new minimum wage architecture was structurally finalized.

MSME Growth Collaborative: Single-window micro-licensing and financial grants were scaled up to bring informal entities into the economic net.

Public Service Delivery, Decentralization & Governance

Federal Civil Service Workflow Automation: Paperless digital transitions were implemented across 28 digitized ministries to accelerate approvals.

Implementing the Oronsaye Report Guidelines: Overlapping agencies were merged to cut redundant overheads, making Merger Phase 1 operational.

The Real-Time e-Procurement Tracking Portal: An open-access platform was implemented mandating ministries to log public tenders for transparency.

Operationalising Local Government Fiscal Autonomy: Direct remittance of statutory fiscal allocations was activated for all 774 standalone LGA bank accounts.

The Single-Window Passport Application Portal: An automated application

framework was deployed for online passport uploads, tracking, and appointments.

Judicial Funding Autonomy Integration: Institutionalized workflows were enforced to direct judicial budget allocations via first-line charges.

The Federation Whistleblower Protection Decree: An active legislative framework was introduced for anonymous reporting, physical protection, and bounties.

National Digital Infrastructure Auditing Accord: Human Capital Management was digitally linked to the IPPIS network to eliminate ghost workers.

Military Pensions & Re-Integration

Liquidating Historic Military Pension Backlogs: Retirement backlogs and gratuities were 100% cleared and settled onto automated payouts.

Veterans' Regional Medical Clinics Project: Fourteen specialized clinics became active and operational for orthopedic treatment and PTSD therapy.

Post-Service Entrepreneurship Resettlement: Intensive trade certification pathways successfully re-skilled 8,500 retired military personnel.

The Military Heroes Family Trust: Over 12,000 family units were enrolled to receive tuition scholarships for children and micro-grants for widows.

The Military Veterans Equity Business Loan: A N15 billion concessionary funding window was established through the BOI for veteran-owned firms.

Armed Forces Amputee Integration Protocol: An active rehab track was established to provide bionic limbs and retrain wounded warriors.

Veterans Housing Scheme Re-engineering: Prioritized mortgage allocations with single-digit 6% interest rates were operationalized for retirees.

The Decorated Veterans Civil Service Integration Act: Rules were established to mandate active hiring priority for honorably discharged veterans.

Foreign Policy, Diaspora & Global Alignments

Advancing the Economic Diplomacy Crusade: Foreign policy was realigned to successfully secure over \$16 billion in foreign direct investment commitments.

The African Continental Free Trade Area Export Track: One hundred and forty-five exporters were certified by integrating industrial nodes with regional frameworks.

The Nigerian Diaspora Direct Investment Trust: A sovereign investment vehicle was

signed and launched for the diaspora to purchase bonds and real estate.

Global Consular Services Digitization Track: Overseas embassies were overhauled by launching 45 operational online e-Consulate portals.

The Nigerian-Diaspora Global Talent Bridge: An active framework was established to link diaspora tech experts with local mentorship hubs.

Bi-National Labour Mobility Agreements: Safe and legal worker mobility accords were successfully negotiated and made active with international blocks.

Sovereign Citizen Protection Directives: Overseas embassies were institutionalized and mandated to provide legal defense and emergency welfare to citizens.

Emergency Management, Flood Control & Relief

Satellite-Linked Early Warning Disaster Radar: A real-time watershed monitoring system reached 68% radar grid coverage to broadcast early flood alerts.

Infrastructural Dredging of Critical Water Channels: Deep-channel sand excavation was completed across 12 critical water channel bottlenecks.

The HYPPADEC Flood Defense Investment Expansion: Forty-two kilometers of concrete walls and dykes were constructed for communities near hydro dams.

Automating Emergency Relief Supply Logistics: NEMA logistics were digitized, successfully slashing delivery response times to under 48 hours.

Special Interventions & Regional Development

The North-East Development Commission Reconstruction: Funding was successfully operationalized to transition from relief to infrastructural construction.

Niger Delta Infrastructure and Stability Push: The NDDC was audited to eliminate project abandonment and focus on finishing shoreline and transport links.

Solid Minerals Industrialization Clusters: Three massive industrial hubs became operational with power plants and refining machinery in northern zones.

Inland Waterways Logistics Integration: Waterways were linked to rail lines by dredging basins and operating a water-to-rail-to-port logistics system.

State-Led Regional Export Hub Initiative: Active, state-wide facilities were established with grading and packaging machinery across every state.

The Northern Livestock Transformation Drive: Ten pilot zones became active with

borehole water and veterinary clinics for sustainable ranching.

Rural Energy Access for Regional Growth: Partnerships with green-energy firms successfully activated 145 solar-hybrid micro-grids for rural markets.

Regional Governance and Financial Integration: A matching grant framework was operationalized for states contributing land and maintenance for federal projects.
